Forecast for Thursday 13 Apr 2023

Weather: A chilly start but a drier and brighter day with sunny spells and perhaps the odd shower. These will generally be lighter than on Wednesday but may fall as a wintry mix on the summits and perhaps carrying the small risk of thunder. Turning drier by the evening with some late sunshine.

Chance of cloud-free hill tops above 600m: 90% but 40% at first. Lowest bases in and around any showers.

Low cloud and visibility: Cloud mainly on higher slopes during the morning, lifting through the day. During any showers, cloud bases may fall to 600-700 metres. Generally, very good visibility but temporarily poor in any heavy showers or summit snow. Excellent air clarity in-between showers.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Compared to Wednesday, much better conditions for hill walking with great visibilities, despite a low risk of a heavy shower. Gusts during the early morning of 40-50 mph will give difficult conditions and buffeting on exposed ridges.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 11 Apr 2023	18.6mm	28.6mm	28.6mm

Forecast for Friday 14 Apr 2023

Weather: Cloudy with outbreaks of rain and summit snow through the morning, perhaps turning more showery during the afternoon, though uncertainty remains on the timing and position of this rain. Likely to clear by late evening with clearing skies overnight. Winds lighter than Thursday through breezy on the summits.

Maximum wind: South-easterly 10-15 mph gusting 20-25 mph

Chance of cloud-free hill tops above 600m: 10% during most of the day possibility increasing to 60% later in the evening.

Low cloud and visibility: Extensive low cloud at 400-500 meters perhaps gradually increasing and breaking up to 600-700 meters later in the day. Visibility generally moderate to poor, particularly in the rain, though could improve later in the day.

Temperature: **Valleys:** Plus 6 Celsius rising to plus 10 Celsius
At 600m: Plus 2 Celsius
Freezing level: Around the highest summits
